**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-27 and 62, drawn to an online gaming system with geographically separated servers, classified in class 463, subclass 42.
- II. Claims 28-32, drawn to an online gaming system for determining the payloads for transactions, classified in class 710, subclass 63.
- III. Claims 33-55, drawn to a random number generator, classified in class 463, subclass 22.
- IV. Claims 56-61, drawn to a gaming system with a web browser, classified in class 463, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination

Art Unit: 3713

as claimed because the online gaming system of Group I which sets up a game transaction does not require the specific transaction engine to process payloads as described in Group II. Furthermore, the random number generator of Group III is an entirely separate invention and this specific random number generator is not required for the other groups of inventions, any random number generator would work. Group III has separate utility as a random number generator. Group IV is a gaming system that includes a web server and web browsers. The specific elements of Group IV do not require any of the specific items from the other groups and has separate utility as a gaming system using browsers.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
